Connecting fish, rivers and people

Create awareness for free-flowing rivers and migratory fish

Activate and energize citizens to protect these important species

WORLD FISH
MIGRATION DAY

Swimways of the world

A large school of salmon swimming underwater. The fish are mostly reddish-pink with dark green heads and silver scales. They are swimming in various directions, creating a sense of movement and abundance. The water is clear and blue, with light filtering through from above.

RIVERS FULL OF FISH

An aerial photograph of a large dam and reservoir. The dam is a long, curved structure made of concrete with many vertical buttresses. Behind the dam is a large reservoir of water. In front of the dam is a power station with two long, white buildings with dark, curved roofs. The power station is situated on a grassy area. To the left of the power station is a road and some houses. The surrounding landscape is hilly and covered with trees, some of which have autumn-colored leaves. The sky is overcast.

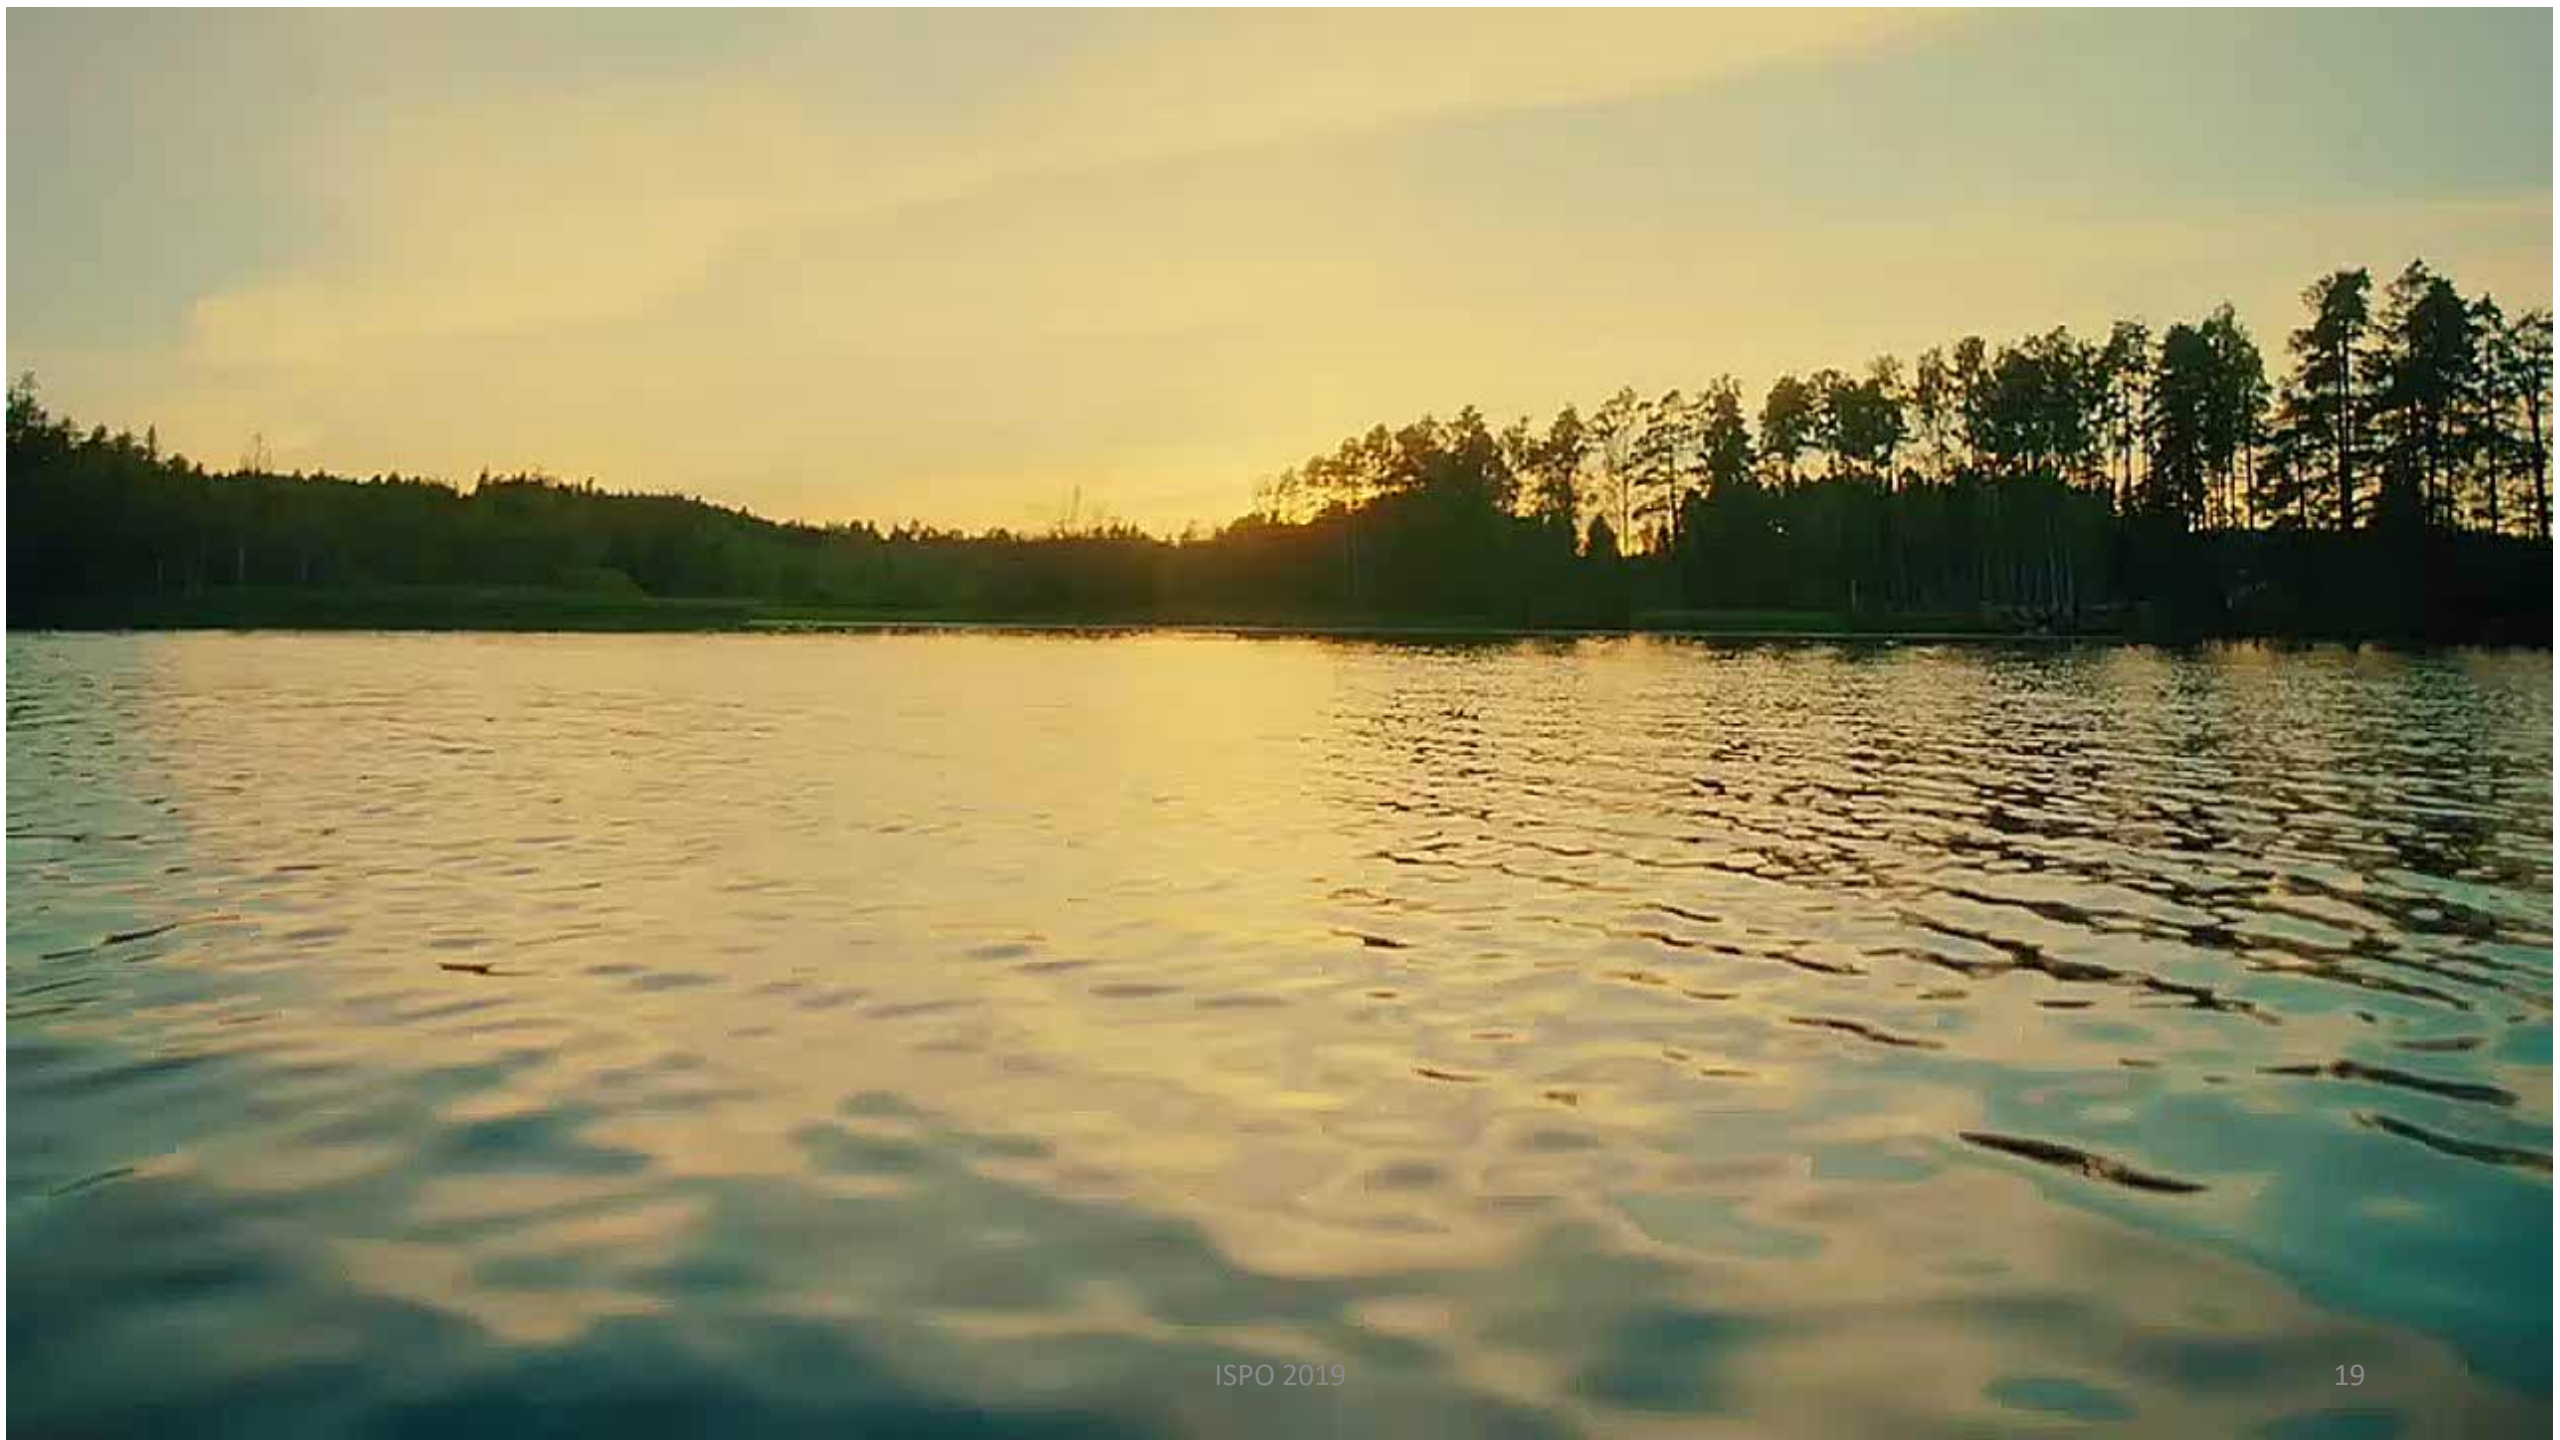

DROWNING RIVERS

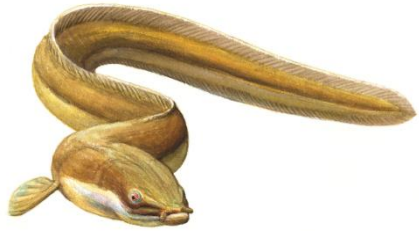

WORLD FISH MIGRATION DAY

06. May 2016 Sindi, Estonia

Creating a movement

1. Targeted seminars
2. Increase case studies and scientific papers
3. Community stories so others can relate
4. Increase social presence
5. Increase media attention towards dam removal projects share positive stories
6. Integration into WFMD by celebrating and stimulating removals
7. Influence policy on water, energy, nature, and stimulate financial mechanisms to remove dams

Liberté, Egalité, Dam Removalité!
